Basic Info	Name: 王麦迪		Gender: Male
	Phone: +86 18852005072		Email: 1772761454@qq.com
Education	College: Nanjing University		Degree: Third year of Bachelor
	Major: Computer Science and Financial Engineering (Double major)		
Previous Internships	2019.1.7-2019.1.18	Backend development of a storage management system at "南京北极星软件有限公司" using ASP.NET.	
	2019.7.29-2019.8.30	Backend development of a lab safety management system at "无锡粒子云信息科技有限公司" using Spring.	
School Project Experience	Innovation project: Automatic Analysis of Iterations using Machine Learning.		
Other Skills	English Skills	CET-4	627 / 720
		CET-6	625 / 720
		TOEFL	109 / 120
		GRE	326 + 3.5 / 340 + 6
	Programming Skills	C/C++, Java, Scala, Python, R	
Personal Interests	I am very obsessed with programming, and I plan on programming for a lifetime. But what I believe more is that demand is the core motivation to programming. Every program should be meant to solve a real-life problem, whether it may be a business related one like management systems or a mood related one like games. To make programming a part of my life, I've been working on a life-bonding program "Malypso" for two years, iterating its functions to solve problems I've met. For example, I developed a module to automatically grab stock data from Sina API, visualize it with a candlestick chart, and predict future trends. The motivation for this module was due to the fact that I couldn't program my own analysis rules on existing software.
